FOAM

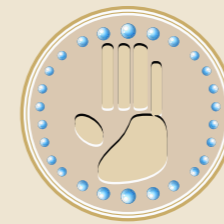

PILLOW TOP

GEL MEMORY FOAM

Bamboo Fabric

Natural anti-bacterial properties act as a barrier against bacteria and dust mites ensuring a hygienic sleep surface. Cool and breathable keeps you cool in the summer and snug in the winter.

Luxurious Gel Fusion Foam

The infusion of gel cells and memory foam regulates body temperature for a comfortable sleep experience. Open cell formation promotes air circulation which ensures that the heat transmitted from the body during sleep dissipates instead of accumulating in the mattress.

Memory Foam

A deep and luxurious layer of memory foam reacts to heat and pressure by molding to the contours of the body, evenly distributing all the weight without undue pressure on joints.

Resilient Foam

Resilient foam core provides additional firmness and support.
